Discrete Mathematics 99 (1992) 341
North-Holland

Author index to volume 99 (1992)

Bergeron, N. and A.M. Garsia, Zonal polynomials and domino tableaux (1-3) 3- 15
Bressoud, D.M., Unimodality of Gaussian polynomials (1-3) 17- 24
Canfield, E.R. and D.M. Jackson, A D-finiteness result for products of permutations (1-3) 25- 30
Décoste, H., G. Labelle and P. Leroux, The functorial composition of species, a forgotten operation (1-3) 31- 48
Désarménien, J. and D. Foata, The signed Eulerian numbers (1-3) 49- 58
Edelman, P.H., R. Simion and D. White, Partition statistics on permutations (1-3) 63- 68
Foata, D., see Désarménien, J. (1-3) 49- 58
Garsia, A.M., Orthogonality of Milne's polynomials and raising operators (1-3) 247-264
Garsia, A.M., see Bergeron, N. (1-3) 3- 15
Goulden, I.P., A linear operator for symmetric functions and tableaux in a strip with given trace (1-3) 69- 77
Haiman, M.D. and D. Kim, A characterization of generalized staircases (1-3) 115-122
Haiman, M.D., Dual equivalence with applications, including a conjecture of Proctor (1-3) 79-113
Hanlon, P., A Markov chain on the symmetric group and Jack symmetric functions (1-3) 123-140
Jackson, D.M., see Canfield, E.R. (1-3) 25- 30
Kim, D., see Haiman, M.D. (1-3) 115-122
Labelle, G., On asymmetric structures (1-3) 141-164
Labelle, G., see Décoste, H. (1-3) 31- 48
Lascoux, A. et M.-P. Schützenberger, Décompositions dans l'algèbre des différences divisées (1-3) 165-179
Leroux, P., see Décoste, H. (1-3) 31- 48
Liang, K. and M.L. Wachs, Mahonian statistics on labeled forests (1-3) 181-197
Milne, S.C., Classical partition functions and the $U(n+1)$ Rogers–Selberg identity (1-3) 199-246
Remmel, J.B., Formulas for the expansion of the Kronecker products $S_{(m,n)} \otimes S_{(1^p-^r,r)}$ and $S_{(1^k2^l)} \otimes S_{(1^p-^r,r)}$ (1-3) 265-287
Sagan, B.E., Inductive proofs of q-log concavity (1-3) 289-306
Schützenberger, M.-P., see Lascoux, A. (1-3) 165-179
Simion, R., see Edelman, P.H. (1-3) 63- 68
Stembridge, J.R., Eulerian numbers, tableaux, and the Betti numbers of a toric variety (1-3) 307-320
Strehl, V., Identities of Rothe–Abel–Schläfli–Hurwitz-type (1-3) 321-340
Wachs, M.L., An involution for signed Eulerian numbers (1-3) 59- 62
Wachs, M.L., see Liang, K. (1-3) 181-197
White, D., see Edelman, P.H. (1-3) 63- 68
